Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 27 is objected to because of the following informalities: Claim 27 is substantially identical to claim 26. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention. The applicant has failed to incorporate a foreign test standard in the specification.
4. The incorporation of essential material by reference to a foreign application or foreign patent or to a publication inserted in the specification is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or applicants attorney or agent, stating that the amendatory material consists of the same application. *In re Hawkins*, 486 F.2d 569, 179 USPQ 157; *In re Hawkins*, 486 F.2d 569, 179 USPQ 163; *In re Hawkins*, 486 F.2d 569, 179 USPQ 167.
5. In order to avoid a 35 U.S.C. § 112, first paragraph rejection when the applicant attempts to incorporate a foreign test standard in the specification (see page 3, line 23),

it is recommended that the applicant further incorporates the standard in the specification or submit an English translation of the standard.

6. Claims 16-31 are rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Landa et al. (US 5,047,808).

9. Claim 16: Landa teaches a printing blanket comprising a release layer 126, an acrylic rubber layer 122, and a heater 120 by way of woven heater wire 130 in the order thereof (Fig. 3c, and col. 7, line 53 thru col. 8, line 5). The release layer 126 meets the claimed release layer, the acrylic rubber layer 122 meets the claimed withstand voltage layer, the heater 120 meets the claimed conductive compressive and the woven heater wire 130 meets the claimed conductive support layer.

10. Claim 19: Landa teaches the acrylic rubber layer 122 has a thickness of 850 um (0.85mm) (col. 7, line 62 and col. 9, line 49). The total thickness of the acrylic rubber layer 122 and the heater 120 is 1500um (col. 9, line 49), the thickness of the heater 120

is 650um (col. 7, line 62); and the calculated value of the acrylic rubber layer 122 is 850 um {1500um-650um}.
